

Linking People And Plants

Dear students and those interested in horticultural therapy training,

HTI continues to use care in conducting our face-to-face classes. To protect all present, we strongly encourage students be fully vaccinated and boosted for COVID-19 before attending. Indoor masking during class is currently optional, with the expectation that all students respect any masking request from those to whom they are in contact. This policy may be modified to **require** vaccination **plus** masking if future conditions warrant. You will be notified before class if indoor masking is required.

Your safety is important to us. We also know the value of on-site, face-to-face horticultural therapy instruction with quality interaction and engagement with the instructor and fellow students, thus we will continue to encourage students to take as many classes face-to-face as possible. For each course we offer a choice between a section that is face-to-face or one that use a synchronous live online meeting format.

For questions email Christine Capra at: ccapra@htinstitute.org or call 303-388-0500.
